Andy and Leena,
Attached are preliminary data from the GM January investigation. They are also proposing to install 2 additional monitoring wells in the S3 unit.

Subject: Proposed Monitoring Wells at Allison Transmission

Don,
We are finalizing the data report with the information from the recently collected groundwater samples. Based on those results and the understanding of the concerns regarding potential migration of VOCs from the Allison facility, we are proposing installation of 2 additional wells in the S-3 sand unit. Please see the attached drawings. Before we submit the final data report with the proposed well locations we would appreciate if you would let us know if you have any comments or questions on the proposed locations.

Thank you,
David Favero
